Michael Coleman [Redbirdfan38@gmail.com](mailto:Redbirdfan38@gmail.com)

Abriana Garrison [Woodsae99@gmail.com](mailto:Woodsae99@gmail.com)

TA - Dom Hallan [Dom@domhallan.com](mailto:Dom@domhallan.com)

## Why ?

- Reduce waste and promote food sustainability
- Effectively utilize items before expiring
- Ease food management
- Support on-the-go lifestyle for grocery shopping
- Solve a problem with groceries that is commonly shared

# TECH

## MERN-Stack

- MongoDB
- ExpressJS
- ReactJS
- NodeJS

## Frameworks/Libraries

- TailwindCSS
- Mongoose

## Tooling

- MongoDB Compass
- Insomnia/Postman
- Cypress
- Jest
- [Trello](#)
- Balsamiq

# Features

- Display food inventory and alert users of expiring and low stock items in their LazySusan
- Add, remove, and change items in the pantry, refrigerator, and freezer.
- Allow users to search inventory by item name, location, and food group.
- Suggest recipes to utilize expiring items and reduce food waste.
- Create a shopping list that you can use in the grocery store.
- Create an account and log-in.
